# Find your size

Choosing the right size is important to make sure your new ring fits perfectly. To find your size, wrap a thin strip of paper around the finger that will be wearing the ring. Use a pen or pencil to mark where the paper overlaps. Measure the distance up to this line to determine the inner circumference of your ring:

## Size chart

Size	Inner circumference (mm)
60	60
61	61
62	62
63	63

A single millimeter can make a big difference - we recommend measuring your finger a few times to ensure you get just the right fit.
